Domain	Subdomain	Metric	Metric description	Source	Baseline Ohio (Year)) Baseline Ohio	Most-recent Ohio (Year)	Most-recent Ohio	Percent change	Trend
Early Childhood adversity and trauma prevention	Family well-being and resilience		Percent of women with a live birth who reported stressful life events or experiences during pregnancy. Stressful life events are categorized into Emotional (close family member was sick and/or someone very close to mother died), Partner-related (argued with partner more than usual, partner said didn't want pregnancy, apart from partner due to military deployment or work travel, and/or separation/divorce), Financial (had problems paying bills, partner lost job, cut in work hours or pay, and/or mother themselves lost job), and Traumatic (someone very close had a bad problem with drinking/drugs, partner or self to went to jail, and/or homeless)	Ohio Pregnancy Assessment Survey	See disaggregated data	See disaggregated data	See disaggregated data	See disaggregated data	N/A	N/A
Early childhood adversity and trauma prevention	Trauma and toxic stress		Percent of children, ages 0-5, whose caregiver reported that they experienced 2 or more adverse experiences (ACEs), among eight ACEs: Parent or guardian divorced or separated; parent or guardian died; parent or guardian served time in jail; child saw or heard parents or adults slap, hit, kick punch one another in the home; child was a victim of violence or witnessed violence in neighborhood; child lived with anyone who was mentally ill, suicidal, or severely depressed; child lived with anyone who had a problem with alcohol or drugs; and child treated or judged unfairly due to race/ethnicity	Ohio Medicaid Assessment Survey	2019	17.0%	2021	14.3%	-16.2%	Improved
Early childhood adversity and trauma prevention	Family well-being and resilience	Supportive neighborhood. Percent of children, ages 0-5, who lived in a supportive neighborhood	Percent of children, ages 0-5, whose caregiver reported that they live in a supportive neighborhood. This measure is referred to in various contexts as "neighborhood support," "neighborhood cohesion," and "social capital," and is derived from responses to three statements: People in this neighborhood help each other out (K10Q30); We watch out for each other's children in this neighborhood (K10Q31); and Wher we encounter difficulties, we know where to go for help in our community (GOFORHELP). Respondents were asked whether they definitely agree, somewhat agree, somewhat disagree, or definitely disagree with each statement. Children are considered to live in supportive neighborhoods if their caregivers reported "definitely agree" to at least one of the items above and "somewhat agree" or "definitely agree" to the other two items. Only children with valid responses on all three items are included	Administration, National Survey of Children's Health	N/A	N/A	2022	58.6%	N/A	N/A
Early childhood adversity and trauma prevention	Trauma and toxic stress	Domestic violence. Percent of children, ages 0- 5, who witnessed domestic violence	Percent of children, ages 0-5, whose caregiver answered yes to the following question: "Child ever experienced, saw or heard parents or adults slap, hit, kick or punch one another in the home?"	Ohio Medicaid Assessment Survey	2019	6.6%	2021	4.8%	-27.3%	Greatly In
Early childhood adversity and trauma prevention	Trauma and toxic stress	Parental incarceration. Percent of children, ages 0-5, with a parent or guardian who served time in jail	Percent of children, ages 0-5, whose caregiver answered yes to the following question: "Parent or guardian served time in jail after child was born?"	Ohio Medicaid Assessment Survey	2019	10.7%	2021	7.7%	-28.0%	Greatly In
Early childhood adversity and trauma prevention	Trauma and toxic stress	Mental illness or substance use in the household. Percent of children, ages 0-5, who lived with someone with a mental illness or substance use disorder	Percent of children, ages 0-5, whose caregiver answered yes to either of the following questions: "Child ever experienced living with anyone who was mentally ill, suicidal, or severely depressed?" and/or " Child ever experienced lived with anyone who had a problem with alcohol or drugs?"	-	2019	18.4%	2021	15.7%	-14.7%	Improved
Economic Stability	Employment and poverty	Poverty. Percent of children, ages 0-5, who lived below 100% of the federal poverty level	Percent of children, ages 0-5, who lived below 100% of the federal poverty level	U.S. Census Bureau, American Community Survey 5-Year Estimates	2013-2017	25.0%	2018-2022	20.5%	-17.9%	Improved

Economic Stability	Employment and poverty	Extreme Poverty. Percent of children, ages 0-5, who lived below 50% of the federal poverty level	Percent of children, ages 0-5, who lived below 50% of the Federal Poverty Line	U.S. Census Bureau, American Community Survey 5-Year Estimates	2013-2017	12.6%	2018-2022	10.3%	-17.7%	Improved
Economic Stability	Employment and poverty	Job change due to child care, family members. Percent of children, ages 0-5, with a family member who had to change their job due to problems with child care in the past 12 months	Percent of children, ages 0-5, with a family member who had to quit a job, not take a job, or greatly change their job because of problems with child care in the past 12 months	Health Resources and Services Administration, National Survey of Children's Health	N/A	N/A	2021-2022	13.9%	N/A	N/A
Economic stability	Employment and poverty	Employment insecurity, parents. Percent of children, ages 0-5, who live in families where no caregiver was employed full-time	Percent of children, ages 0-5, who live in families where no caregiver was employed full-time.	Health Resources and Services Administration, National Survey of Children's Health	N/A	N/A	2020-2022	10.8%	N/A	N/A
Economic Stability	Employment and poverty	Family structure. Percent of children, ages 0-5, who did not live in a household with two parents	Percent of children, ages 0-5, who did not live with two parents Family type is characterized by number of parents or parental figures present in the household (one, two or other family type) the relationships of parents or other adults in the household (biological/adoptive parents, step-parents, or other family structure) and their marital status. Parents were identified if the reported adult(s) was/were biological/adoptive or step- parent(s). Households identified as having two same sex mothers or fathers were categorized as a two-parent family	Administration, National Survey of , Children's Health	N/A	N/A	2019-2022	20.5%	N/A	N/A
Economic stability	Basic needs	Food insecurity. Percent of children, ages 0-5, whose household could not always afford to eat good nutritious meals in the past 12 months	Percent of children, ages 0-5, whose household could not always afford to eat good nutritious meals in the past 12 months	Health Resources and Services Administration, National Survey of Children's Health	N/A	N/A	2019-2022	29.5%	N/A	N/A
Economic stability	Basic needs		Percent of children, ages 0-5, who lived in households where 30% or more of monthly household pretax income was spent on rent	U.S. Census Bureau, American Community Survey Public Use Microdata 1-Year Estimates	2019	17.1%	2022	14.7%	-13.8%	Improved
Economic stability	Basic needs	Eligible for and receiving WIC, Overall. Percent of women, infants, and children who were eligible for WIC and received WIC benefits	Percent of women, infants, and children who were eligible for the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) who received WIC benefits	U.S. Department of Agriculture, WIC Eligibility and Coverage Rates	2019 5	46.2%	2021	38.9%	-15.8%	Worsened
Economic stability	Basic needs	Eligible for and receiving WIC, Infants. Percent of infants who were eligible for WIC and received WIC benefits	Percent of infants who were eligible for the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) who received WIC benefits	U.S. Department of Agriculture, WIC Eligibility and Coverage Rates	5		2021	80.9%	N/A	
Economic stability	Basic needs	Eligible for and receiving WIC, Pregnant or Postpartum Women. Percent of pregnant or postpartum women who were eligible for WIC and received WIC benefits	Percent of pregnant or postpartum women who were eligible for the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) who received WIC benefits	U.S. Department of Agriculture, WIC Eligibility and Coverage Rates	5		2021	45.7%	N/A	
Economic stability	Basic needs		Percent of children, ages 1-4, who were eligible for the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) who received WIC benefits	U.S. Department of Agriculture, WIC Eligibility and Coverage Rates	2019	34.2%	2021	27.1%	-20.8%	Greatly Worsened
Economic stability	Basic needs	Children experiencing homelessness. Number of children, ages 0-3, who were estimated to be experiencing homelessness	Number of children, ages 0-3, who were estimated to be experiencing homelessness	SchoolHouse Connection, Child and Youth Homelessness in the United States Data Profiles Dashboard	N/A	N/A	2021-2022 school year	7659	N/A	N/A
Economic stability	Basic needs	Household broadband access. Percent of households with children, ages 0-5, that had a broadband internet subscription	Percent of households with children, ages 0-5, that had a high- speed broadband internet subscription service such as cable, fiber optic, or DSL	U.S. Census Bureau, American Community Survey Public Use Microdata 1-Year Estimates	2019	77.6%	2022	84.7%	9.2%	No Change
Healthy	Birth outcomes	Low birthweight. Percent of live births where the infant weighed less than 2,500 grams (5.5 pounds)	Percent of live births, where the infant weighed less than 2,500 grams (5.5 pounds) out of the total number of all births where weight is known	Centers for Disease Control and Prevention, Wide-ranging Online Data for Epidemiologic Research (WONDER)	2020	8.5%	2022	8.7%	2.4%	No Change
Healthy	Birth outcomes	Infant mortality. Number of infant deaths, under age 1, per 1,000 live births	Number of infant deaths, under age 1, per 1,000 live births	Centers for Disease Control and Prevention, Wide-ranging Online Data for Epidemiologic Research (WONDER)	2020	6.7	2022	7.1	5.4%	No Change

Domain	Subdomain	Metric	Metric description	Source	Baseline Ohio (Year) Baseline Ohio	Most-recent Ohio	Most-recent Ohio	Percent change	Trend
Healthy	Birth outcomes	Preterm birth. Percent of infants born preterm, before 37 completed weeks of gestation	Percent of infants born preterm, defined as births before 37 completed weeks of gestation, out of the total number of infants whose completed weeks of gestation are known	Centers for Disease Control and Prevention, Wide-ranging Online Data for Epidemiologic Research (WONDER)	2020	10.3%	(Year) 2022	10.8%	5.1%	No Change
Healthy	Birth outcomes	Neonatal abstinence syndrome. Number of neonatal abstinence syndrome cases among newborn hospitalizations, per 1,000 newborn hospitalizations	Number of neonatal abstinence syndrome related cases among newborn inpatient hospitalizations, per 1,000 newborn hospitalizations	Agency for Healthcare Research and Quality, Healthcare Cost and Utilization Project (HCUP) Fast Stats	1	9.3	2021	8.4	-9.7%	No Change
Healthy	Maternal health	-	Number of deaths related to or aggravated by pregnancy (excluding accidental or incidental causes) occurring within 42 days of the end of a pregnancy, per 100,000 live births	Centers for Disease Control and Prevention, Wide-ranging Online Data for Epidemiologic Research (WONDER), as compiled by America's Health Rankings	2011-2015	20.3	2017-2021	23.7	16.7%	Worsened
Healthy	Maternal health	Severe maternal morbidity. Number of significant life-threatening maternal complications during delivery, per 10,000 delivery hospitalizations	Number of significant life-threatening maternal complications during delivery (measured by identifying women with at least 1 of 17 medical conditions while hospitalized for a delivery), per 10,000 delivery hospitalizations	Health Resources and Services Administration, as compiled by America's Health Rankings	2018	77.8	2020	84.9	9.1%	No Change
Healthy	Maternal health	Postpartum depression. Percent of women, ages 18 and older, with a live birth who experienced postpartum depression	Percent of women, ages 18 and older, with a live birth who experienced postpartum depression after their most recent pregnancy	Ohio Pregnancy Assessment Survey	2020	9.6%	2022	9.8%	2.1%	No Change
Healthy	Maternal health	Prenatal Smoking, cigarettes. Percent of women with a live birth who smoked cigarettes during the last 3 months of pregnancy	Percent of women with a live birth who smoked cigarettes during the last 3 months of pregnancy	Ohio Pregnancy Assessment Survey	2020	9.5%	2022	6.1%	-35.8%	Greatly Improved
Healthy	Maternal health	Prenatal Smoking, e-cigarettes. Percent of women with a live birth who used e-cigarettes during the last 3 months of pregnancy	Percent of women with a live birth who used e-cigarettes during the last 3 months of pregnancy	Ohio Pregnancy Assessment Survey	2020	1.6%	2022	4.6%	187.5%	Greatly Worsened
Healthy	Young child health		Percent of children, ages 0-5, who received a blood lead test and had elevated blood lead levels (≥5 ug/ dL)	Ohio Department of Health	2020	1.9%	2022	1.9%	0.0%	No Change
Healthy	Young child health	Blood lead test. Percent of Medicaid enrollees, ages 0-5, who received a blood lead level test	Percent of Medicaid enrollees, ages 0-5, who received a capillary or venous blood lead test	Ohio Department of Medicaid, Advanced Data Analytics Tool by IBM Consulting	2020	12.5%	2022	12.4%	-0.6%	No Change
Healthy	Young child health	Oral health problems. Percent of children, ages 1-5, who had oral health problems	Percent of children, ages 1-5, whose caregiver answered that, in the past 12 months, their child had frequent or chronic difficulty with one or more of the following: toothaches, bleeding gums or decayed teeth or cavities.
